

Corporate Mental Wellness & Counseling Platform

Functional and Non Functional Requirements

ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall generate an anonymized pseudo-ID for employee accounts to book counseling sessions without revealing corporate email or employee ID to the therapist.	High	Therapist sees only pseudo-ID and no employee PII.	Maintains employee anonymity and confidentiality.
FR-002	Functional	Allow employees to complete and record stress-level assessments.	High	Employee can complete assessment and results are stored successfully.	Enables employees to assess their stress levels.
FR-003	Functional	Allow employees to view therapist availability and book counseling sessions.	High	Employee can select an available slot and receive booking confirmation.	Provides the core counseling appointment functionality.
FR-004	Functional	Allow therapists to view and manage their scheduled counseling sessions using pseudo-IDs.	High	Therapist can view appointments but cannot see employee PII.	Allows therapists to manage sessions while preserving anonymity.
FR-005	Functional	Allow employees to view and track their personal wellness indicators and assessment history.	Medium	Employee can view previous wellness records and changes over time.	Helps employees monitor their wellness progress.
NFR-001	Non Functional	The system shall prevent unauthorized access to employee identity and counseling information.	Critical	Therapist cannot access corporate email, employee ID, or other PII.	Confidentiality is a core requirement of the platform.
NFR-002	Non Functional	The scheduler shall accurately handle timezone conversions and maintain acceptable performance under peak load.	High	Testing confirms correct timezone conversion and target response time under simulated peak load.	Supports employees and therapists across global office locations.

Use-Case Flow Specification: Book Counseling Session

1. Use Case Name

Book Counseling Session

2. Primary Actor

Corporate Employee

3. Supporting Actor

Licensed Therapist

4. Preconditions

1. The employee has access to the Corporate Mental Wellness & Counseling Platform.
2. The employee has a valid system-generated pseudo-ID.
3. Licensed therapists and their available counseling time slots are registered in the system.
4. The appointment scheduling system is operational.

5. Postconditions

1. The counseling session is successfully booked for the employee.
2. The appointment details are stored in the system.
3. The therapist's selected time slot is marked as unavailable.
4. The employee receives a booking confirmation.
5. The therapist can view the scheduled session using the employee's pseudo-ID without accessing the employee's corporate identity.

6. Main Success Scenario

1. The employee logs into the Corporate Mental Wellness & Counseling Platform.
2. The system authenticates the employee and identifies them using their anonymized pseudo-ID.
3. The employee selects **"Book Counseling Session."**
4. The system displays the available licensed therapists.
5. The employee selects a preferred therapist.
6. The system displays the therapist's available dates and time slots.
7. The employee selects a suitable date and time.
8. The system verifies that the selected slot is still available.
9. The system creates the counseling appointment using the employee's pseudo-ID.
10. The system marks the selected time slot as unavailable.
11. The system displays the appointment confirmation to the employee.

12. The system makes the scheduled session available to the therapist using only the employee's pseudo-ID.

7. Alternate Flow

A1. Selected Time Slot Is No Longer Available

1. At Step 8, the system determines that the selected time slot has already been booked by another employee.
2. The system informs the employee that the selected slot is no longer available.
3. The system displays other available time slots for the selected therapist.
4. The employee selects another available slot.
5. The system verifies the new slot.
6. The system creates the appointment and displays the booking confirmation.
7. The therapist can view the appointment using the employee's pseudo-ID.
